Authorization for this examiner's amendment was given in a telephone interview with Ilya Zbarovsky on June 9, 2006.

The application has been amended as follows:

Claims 11 and 13 have been cancelled.

Claim 14 (new) A device for holding a showerhead comprising an attaching element attachable to a surface; and a holding element turnable relative to said attaching element, the attaching element being provided with a plurality of formations which are spaced from one another while the holding element is provided with at least one counter formation engageable with any of said first mentioned formations so as to fix said holding element relative to said attaching element in a corresponding position, said holding element having an elastically displaceable part on which said at least one counter formation is formed so that when said holding element is turned relative to said attaching element, said elastically displaceable part displaces and said at least one counter formation can display over a corresponding one of said first mentioned formations and to engage between two neighboring ones of said first mentioned formations, said holding element having a showerhead receiving area in communication with said elastically displaceable part such that when the showerhead is received in said

wherein the elastically displaceable part is in communication with a showerhead receiving area such that when a shower head is received in the receiving area, the elastically displaceable part can no longer displace and thereby the at least one counter formation can no longer move over a corresponding one of the first mentioned formations and thereby a position of the holding element relative to the attaching element is fixed as recited in the independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
